## DETAILED ACTION

Claims 1-10 are currently pending.

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, drawn to an binding assay method, classified in class 435, subclass 6.
- II. Claim 10, drawn to a method of producing a display library, classified in class 435, subclass 69.1.

The inventions are distinct, each from the other because of the following reasons:

The methodS of Groups I and II are patentably distinct inventions which are drawn to different method objectives, possess different method steps and necessesite additional and separately burdensome manual/computer bibliographic searches.

1. Because these inventions are distinct for the reasons given above and
  - a. have acquired a separate status in the art as shown by their different classification; and/or
  - b. difference in manual/computer classification, structure, name and bibliographic searches; and/or
  - c. inventions have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

**3. ELECTION OF SPECIES (GROUP I ONLY)**

This application contains claims directed to the following patentably distinct species of the claimed invention:

- A. "Target Molecules" (e.g. see claim 3); AND
- B. "Biological Activity Change" (e.g. see claim 4)

The search of the above individual species present in items A. and B above necessitate additional/separate manual/computer searches (e.g. bibliographic).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

### **CONCLUSION**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bennett Celsa whose telephone number is 571-272-0807. The examiner can normally be reached on 8-5.
